Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oh in view of Verheijen. Oh discloses the claimed invention except for the recitation of the user interface configured to receive a numerical quantity relating to a desired amount of water. Verheijen teaches a water dispensing system which has a user interface 20 configured to receive a numerical quantity relating to a desired amount of water. See especially column 3, lines 22-29. It would be obvious to provide Oh with a user interface which is configured to receive a numerical quantity relating to a desired amount of water, in view of Verheijen, for the purpose of providing a precisely desired amount of water.

3. Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-20 are allowed.

5. Applicant's arguments with respect to claims 21 and 22 have been considered but are moot in view of the new ground of rejection.
